This material aims

To assist you to improve your performance in key health and safety issues

To help you identify the necessary skills and the level of knowledge that you need to effectively manage occupational risks in your workplace

Remember

This material and its content
DOES NOT REPLACE the
training you should receive
from your company

DOES NOT REPLACE your
supervisor, your health and
safety manager or the
employer

DOES NOT present the actual
hazards that may be present
in your workplace

DOES NOT depict the Health
and Safety Policy and Goals
of your company

PROVIDES examples and
covers a few common
hazards that are present
across the extractive sector

THIS MATERIAL will be updated to cover a wide range of occupational safety issues

For this purpose we ask for your feedback, experience, pictures, best practices etc.
